SUMMARY

Software developer and BSIT student using Python, JavaScript and TypeScript to build and debug applications. Lead code reviews and explain technical decisions through mentoring and documentation.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL
Development: FastAPI, Flask, React, Next.js, REST APIs
Data and AI: PostgreSQL, Supabase, pgvector, SQLite, embeddings, LLM APIs
Quality and communication: Git, debugging, input validation, automated testing; English: Fluent

TECHNICAL EXPERIENCE

Web Development Lead Jan 2026 - Present
AWS Student Builder Group - JRU | Student leadership

- Lead a 10-person development team, review code, and mentor members in Git, JavaScript and web fundamentals.
- Built Python/FastAPI registration APIs with Pydantic validation, PostgreSQL persistence and automated application emails.
- Integrated a Groq-powered chatbot with streaming responses, input guardrails, rate limiting and caching.

Freelance Developer Project-based
Independent commissions

- Delivered two applications for nursing and engineering students, translating client requirements into working software.
- Built and deployed Care Cures using Next.js, TypeScript and Supabase, providing bilingual English/Tagalog health information.

Backend AI Engineer Intern | FlyRank AI Jun 2026 - Sep 2026

Information Technology Intern | Top Realty Corporation Oct 2026 - Present

SELECTED PROJECTS

Rule VII | Python, FastAPI, PostgreSQL, pgvector

- Built a retrieval pipeline using text embeddings and pgvector to supply building-code context for AI-assisted architectural guidance.
- Designed PostgreSQL data structures and authenticated FastAPI endpoints with JWT verification and rate limiting.

Hydra | Python, Flask, SQLite

- Developed a pipeline to scrape, validate, geocode and store public infrastructure records for a hackathon project.
- Implemented rule-based checks using contractor history, project costs and timeline discrepancies to flag anomalies.

EDUCATION

Jose Rizal University 2024 - Present
Bachelor of Science in Information Technology (in progress)

LEADERSHIP

Vice President of External Affairs Apr 2026 - Present
AWS Student Builder Group - JRU
Manage 5-10 partnership inquiries monthly and draft formal correspondence; secured two official partnerships.
